### Competency EC #1 Heat transfer; Fluids; Natural convection

#### Why is EC #1 an emerging competency of Romania?

SciVal Spotlight identified EC #1 as an **emerging competency** of Romania because it is a field of research in which **Romania has a significant presence.**

[More details »](#)

#### Why is EC #1 not a distinctive competency of Romania?

This field met the following criterion:

##### Significantly large field of research

2,485 articles were published worldwide in this field over the period 2007-2011. These articles add up to a total fractionalized article count of 1,321.8.

[More details »](#)

but it did not meet any of the following three criteria:

##### Publication leader

Romania is ranked #2 in this field by number of published articles.

[More details »](#)

##### Reference leader

Romania is ranked #5 by number of highly cited articles.

[More details »](#)

##### Innovation leader

Romania is citing more recent work than the country ranked #1 in this field, but is not a significantly large enough contributor to this field.

[More details »](#)

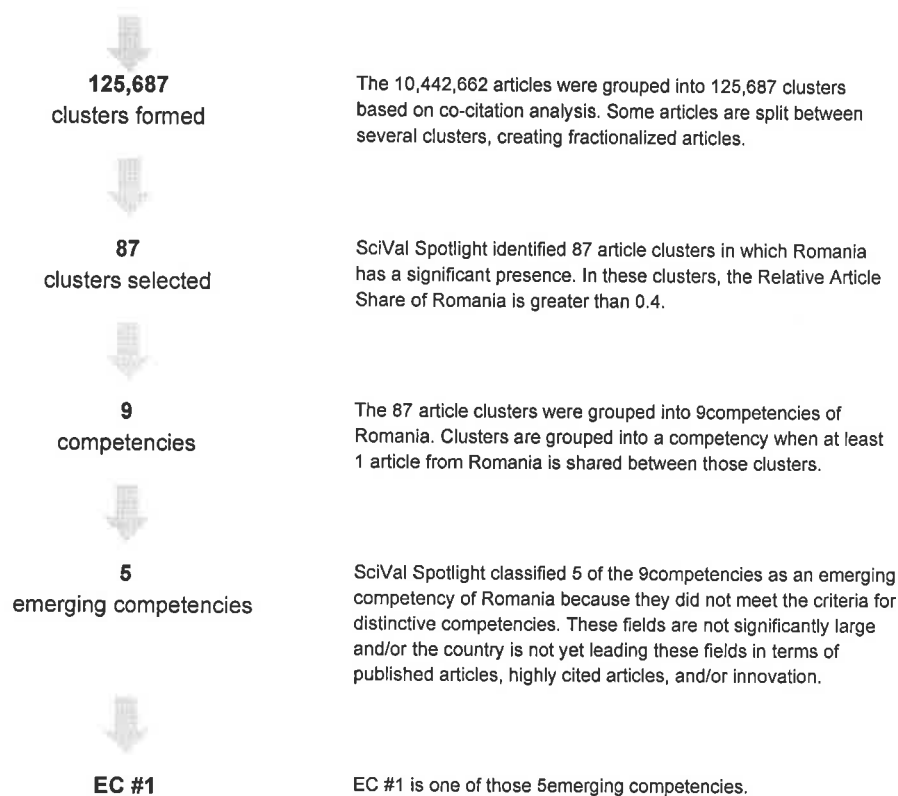

#### EC #1 is not a distinctive competency

This field is significantly large in terms of published articles, but Romania is not a publication, reference or innovation leader in this field.

#### What were the steps to create EC #1?

10 million  
articles

10,442,662 articles published over the period 2007-2011 were extracted from SciVerse Scopus.

### What does EC #1 look like?

This emerging competency is made up of **17 article clusters**. The graph on the left shows these clusters and how they are connected through shared articles.

[View the graph at full size »](#)

### How to read this graph

Each circle represents an article cluster. The size of each circle indicates the number of articles in that cluster. The colour indicates the dominant subject area in that cluster.

The lines between the circles show how clusters are connected through shared articles.

In the full-size graph, you can examine each cluster in detail, as well as the connections between them.

## Competency DC #2 Fixed point theorem; Fixed point; Result

### Why is DC #2a distinctive competency of Romania?

SciVal Spotlight identified this field as a **distinctive competency** of Romania because it meets the following criterion:

#### Significantly large field of research ✓

2,409 articles were published worldwide in this field over the period 2007-2011.  
These articles add up to a total fractionalized article count of 1,167.0.

[More details »](#)

and it meets **at least one** of the following three criteria:

#### Publication leader ✕

Romania is ranked #2 in this field by number of published articles.

[More details »](#)

#### Reference leader ✕

Romania is ranked #2 by number of highly cited articles.

[More details »](#)

#### Innovation leader ✓

Romania is a major contributor to in this field, and is citing more recent work than the country ranked #1.

[More details »](#)

#### DC #2 is a distinctive competency

because it is a significantly large field of research, and Romania is an innovation leader in this field.

### What were the steps to create DC #2?

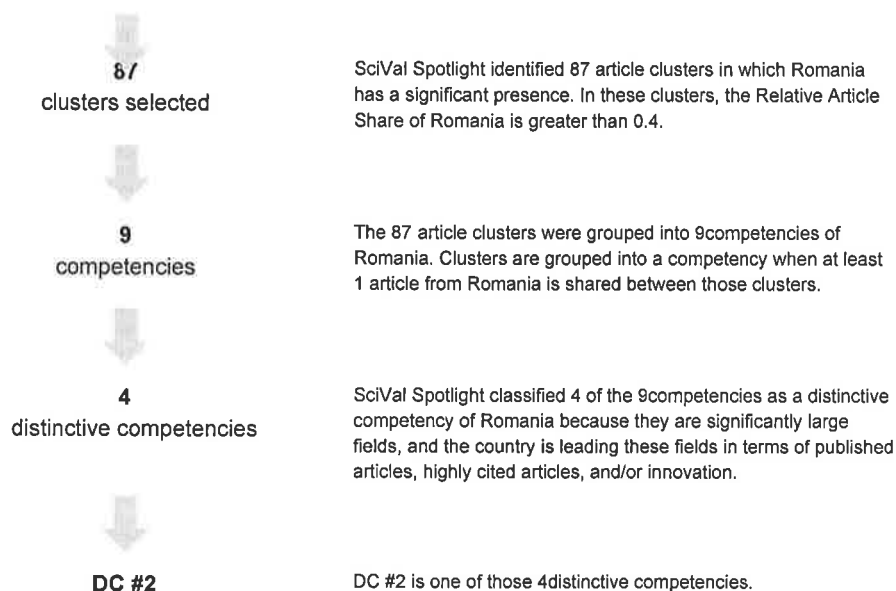

10 million  
articles

125,687  
clusters formed

10,442,662 articles published over the period 2007-2011 were extracted from SciVerse Scopus.

The 10,442,662 articles were grouped into 125,687 clusters based on co-citation analysis. Some articles are split between several clusters, creating fractionalized articles.

### What does DC #2 look like?

This distinctive competency is made up of **15 article clusters**. The graph on the left shows these clusters and how they are connected through shared articles.

[View the graph at full size »](#)

### Why is DC #8a distinctive competency of Romania?

SciVal Spotlight identified this field as a **distinctive competency** of Romania because it meets the following criterion:

#### Significantly large field of research ✓

1,503 articles were published worldwide in this field over the period 2007-2011. These articles add up to a total fractionalized article count of 555.3.

[More details »](#)

and it meets **at least one** of the following three criteria:

#### Publication leader ✓

Romania is ranked #1 in this field by number of published articles.

[More details »](#)

#### Reference leader ✓

Romania is ranked #1 by number of highly cited articles.

[More details »](#)

#### Innovation leader ✗

Romania is the publication leader this field, but is not citing more recent work than the country ranked #2.

[More details »](#)

#### DC #8 is a distinctive competency

because it is a significantly large field of research, and Romania is a publication and reference leader in this field.

### What were the steps to create DC #8?

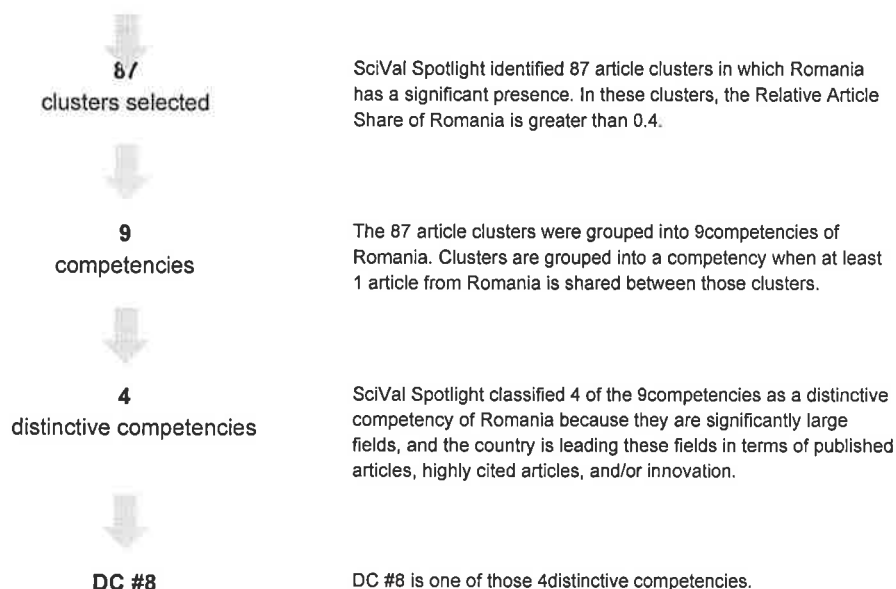

**10 million**  
articles

**125,687**  
clusters formed

10,442,662 articles published over the period 2007-2011 were extracted from SciVerse Scopus.

The 10,442,662 articles were grouped into 125,687 clusters based on co-citation analysis. Some articles are split between several clusters, creating fractionalized articles.

### What does DC #8 look like?

This distinctive competency is made up of **8 article clusters**. The graph on the left shows these clusters and how they are connected through shared articles.

### How to read this graph

Each circle represents an article cluster. The size of each circle indicates the number of articles in that cluster. The colour indicates the dominant subject area in that cluster.

The lines between the circles show how clusters are connected through shared articles.

In the full-size graph, you can examine each cluster in detail, as well as the connections between them.

## Competency DC #9 Glass; Ions; Chemical analysis

### Why is DC #9a distinctive competency of Romania?

SciVal Spotlight identified this field as a **distinctive competency** of Romania because it meets the following criterion:

#### Significantly large field of research ✓

1,028 articles were published worldwide in this field over the period 2007-2011. These articles add up to a total fractionalized article count of 522.0.

[More details »](#)

and it meets **at least one** of the following three criteria:

#### Publication leader ✓

Romania is ranked #1 in this field by number of published articles.

[More details »](#)

#### Reference leader ✓

Romania is ranked #1 by number of highly cited articles.

[More details »](#)

#### Innovation leader ✓

Romania is the publication leader in this field, and is citing more recent work than the country ranked #2.

[More details »](#)

#### DC #9 is a distinctive competency

because it is a significantly large field of research, and Romania is a publication, reference and innovation leader in this field.

### What were the steps to create DC #9?
